Privacy Policy

Thank you for choosing **T Vartha**. This Privacy Policy explains how our application collects, uses, and protects information when you use our mobile application.

1. Information We Collect

T Vartha is designed to be privacy-friendly. We do not require users to create an account, and we do not collect direct personal identifiers such as your name, physical address, or phone number.

However, to provide a functional experience and serve advertisements, certain data may be collected automatically:

- **Device Information:** Device model, operating system version, and unique device identifiers.
- **App Usage Data:** Interactions within the app, such as which news categories you frequently view.
- **Digital Identifiers:** IP addresses and Advertising Identifiers (such as Google AAID). Under certain laws (like GDPR or CCPA), these may be considered personal data.

2. News Content & Intellectual Property

T Vartha aggregates news content from publicly available **RSS feeds provided by third-party publishers**.

We do not create, edit, or modify the news content. All rights belong to the original authors and publishers.

T Vartha acts only as a **news aggregator** and does not claim ownership of any news articles displayed in the application.

Whenever possible, we provide direct links to the **original publisher's website** so users can read the complete article from the source.

If you are a publisher and wish to have your RSS feed removed from our application, please contact us at the email address listed below.

3. Third-Party Services

We partner with third-party service providers to power specific features in our application. These services may collect information according to their own privacy policies.

These services may include:

- **Google AdMob** – used to display advertisements. They may use device identifiers to personalize ads.
- **Firebase Analytics** – used to analyze app performance and improve stability.

These third-party services may collect information such as device identifiers, IP address, and app interaction data according to their own privacy policies.

4. Advertising

Our application may display advertisements provided by third-party advertising networks such as Google AdMob.

These advertising services may use device identifiers or cookies to deliver relevant advertisements and measure ad performance.

Users can manage or reset their advertising identifiers through their device settings.

5. Internet Permission

T Vartha requires an internet connection to fetch the latest news from RSS feeds and to display advertisements.

6. External Links

Our application may contain links to external websites from third-party news publishers.

We are not responsible for the privacy practices or content of these external websites. Users should review the privacy policies of those websites before providing any personal information.

7. Data Security

We use commercially acceptable methods to protect the limited data we collect. However, no method of electronic transmission over the internet is completely secure.

8. Children's Privacy

T Vartha does not knowingly collect personal information from children under the age of 13.

If we discover that a child under 13 has provided personal information, we will take steps to remove that information immediately.

9. Your Rights & Choices

You have control over your data:

- **Opt-Out of Personalized Ads:** You can reset or disable advertising identifiers through your device settings.
- **Stop Data Collection:** Since we do not maintain user accounts, the easiest way to stop any data collection is by uninstalling the application.

10. Changes to This Policy

We may update this Privacy Policy from time to time. Any changes will be posted on this page with an updated **Effective Date**.

11. Contact Us

If you have any questions or suggestions regarding this Privacy Policy, please contact us:
